

ARE YOU "THE ONE"?

Our customers include major utility companies such as Ørsted, SIEMENS and MHI VESTAS etc., which demands high quality and reliability in our supplied services. The offshore wind farms are located in Europe and we are working in an internationalized environment. Today, we have almost 40 Crew Transfer Vessels (CTV's) in operation and we recently took over management of 7 CTV'S. Due to this further expansion, we are now seeking Masters or Mates.

As a Master or Mate you will be responsible for the daily transport of technicians and spare parts for the wind energy stations offshore in Europe. You are going to be an important person in order to create the highest standard of professional service for our customers. You will also have to cooperate with our onshore management. We are looking for persons with offshore knowledge and the right qualifications (STCW II/3) or higher and a positive attitude. You must have the ability to cooperate with your colleagues and you must also have the ability to express yourself orally and in writing, both in Danish or Swedish and in English. If you are able to handle the German language this will be a plus.

In the work, you are expected to act and make independent decisions but at the same time have good interpersonal skills. We offer you to work in a new exciting and fast growing industry which offers good opportunities for development and future career paths.
